

Watercolor on Yupo Workshop

Instructor: Ann Ranlett

Explore the possibilities of watercolor painting on this unique surface.

Yupo is a slick and non-absorbent synthetic paper. These properties allow the colors to remain bright and vibrant and to flow and blend differently than on traditional watercolor paper. Interesting patterns and watermarks are created, paint can be pushed around and lifting is easy.

See supply list – must bring supplies to class!

Working with Watercolor on Yupo

- Introductions & goals
- Discuss materials & methods; show examples; comparison of watercolor on paper vs. Yupo
- Learning to work on Yupo – various subjects & techniques
- Short break for lunch (bring your own)
- Work on paintings from student supplied photos
- Review/discussion of student work
